Family centered care
FCC is based on the philosophy that quality care can be provided in an environment that family promote the psychological and physiological health of the child. It assumes that if the family gain adequate information and support capable of making health care decisions.
Family Centered Care - Concepts

• **Enabling**
  – Enable families by creating opportunities and means for all family members to display their current abilities and competencies to acquire new ones.

• **Empowering**
  – Interact such that families maintain or acquire a sense of control over their lives and acknowledge positive changes.
HIGH TECHNOLOGY CARE
The advancement in the diagnostic technology has made detection of many disorders even in the foetal period. Laboratory methods to assess foetal maturity and health of the foetus in the womb.
EVIDENCE BASED PRACTICE
In evidence based practice, nurses need to make decisions on the best available evidence. EBP in nursing provides a systematic approach to enable nurses to effectively use the best solution related to nursing practice.
PRIMARY NURSING
The system of primary nursing provides extreme commitment to patient accountability. 24 hour responsibility and accountability by one nurse for the care of a small group of patients is possible with primary nursing.
Case management
Case management

It is considered as an extension of primary nursing. It is usually used in outpatient setting by assigning a case management to a patient or a group of patients.
CHILD ORIENTED ENVIRONMENT
Conti......

A child friendly environment should be provided to a child who is admitted to hospital.
ATRAUMATIC CARE

“FIRST DO NO HARM”
COST CONTAINMENT
